

## 20 Benefits of GPS Tracking That Our Customers Say Contribute Thousands of Dollar\$ To Their Bottom Line

1. **Increase Driver Efficiency & Profits** - increase number of deliveries/jobs over the same time period.
2. **Eliminate Unauthorized Travel** – eliminate unnecessary liability exposure.
3. **Limit Speeding Incidents** – decrease the likelihood of speeding, number of accidents, worker compensation claims, environmental issues, and loss of equipment and risk.
4. **Improve Customer Service** – facilitate immediate dispatching, manage customer expectations and provide proof of service/vehicle location.
5. **Eliminate Unauthorized Use of Company Assets** – monitor after-hours vehicle movement and behavior.
6. **Identify Location & Progress** – receive immediate asset location and quick resolution of billing disputes.
7. **Automate IFTA Reports** – receive automated reports of mileage and fuel usage in multiple states.
8. **Automate “Off Road” Fuel Tax Rebate** – automatically capture idling and PTO time, resulting in tax credits.
9. **Equipment Utilization** – measure actual utilization vs. reported utilization.
10. **Time/ Distance Measurement** – understand route optimization to increase productivity.
11. **Timecard Management** – facilitate automatic payroll and reduces overtime hours.
12. **Temperature Monitoring** – prevent loss of perishable products.
13. **Monitor / Modify Employee Behavior** - verify customer visits and time spent with customers.
14. **Stop-Location Identification** – eliminate side jobs & theft and identify unproductive and dishonest employees.
15. **Optimize Employee Efficiency** – identify the amount of time needed to complete a job
16. **Monitor Job Start & Stop Times** – automate job time capture for accurate billing and weekly/monthly job forecasting.
17. **Exact Vehicle Location** – provide evidence in fraudulent accident claims.
18. **Automate Maintenance Service Alerts** –receive alerts when service is due and extend the life of equipment, increase vehicle & driver safety and reduce repair costs.
19. **GPS Mapping** – identify vehicle location and enable rerouting of vehicles.
20. **Report Download Functionality** – download reports and save them for future reference in the event of an audit, lawsuit, theft, fraudulent claim etc.

### **Reduced Cost + Reduced Risk + Increased Efficiencies + Increased Productivity = Increased Profit\$**

Fleet management & vehicle security solutions will increase profits by reducing costs and gasoline expenses while increasing gas mileage and safety and efficiency. Easily scalable to any size fleet, our solutions track vehicle and driver activity and translate that activity into an easy to use, internet accessible event and exception-based reporting system.
